

## **PRIMO SUSTAINABLE PRODUCTS**

### **Product Data Sheet**

#### **Primo Prep Coat**

Primo Prep Coat is an all natural green building product. It is a strong fixative and bonding agent and is an extremely important step to provide proper adherence for Primo Classic Marmorino, Primo Fine Marmorino and Primo Carrara Marmorino. It is produced from a mixture of calcium carbonate, clay, titanium dioxide, silica sand and other organic binders.

#### **Application**

Primo Prep Coat can be applied onto drywall or existing plaster or cement substrate using a brush, foam roller, or drywall hopper gun. This product can be diluted up to 25% depending upon the surface. Primo Prep Coat comes untinted.

**Color:** Naturally white in color

**Flash Point:** None

**Composition:** Calcium carbonate, clay, titanium dioxide, silica sand and other natural binders

**Health Hazards:** Avoid continual contact with skin or eyes. Always wear safety glasses and rubber gloves when handling mixture. Prolonged contact may irritate skin. Direct eye contact can cause permanent damage to vision. Do not ingest or inhale product. If product comes in contact with skin, wash off with soap and water. If contact with eyes occurs, flush with water and contact a physician. If product is ingested, drink plenty of water and contact a physician.

**Product Handling:** Whenever possible contain and sweep up spillage. Product contains alkaline material. Dispose of product in accordance with Federal, State and local regulations.
